

Yellow paint on rocks at location 2. Lichens of interest are almost always solitary and on the flattest part of the rock... not on same side as paint.

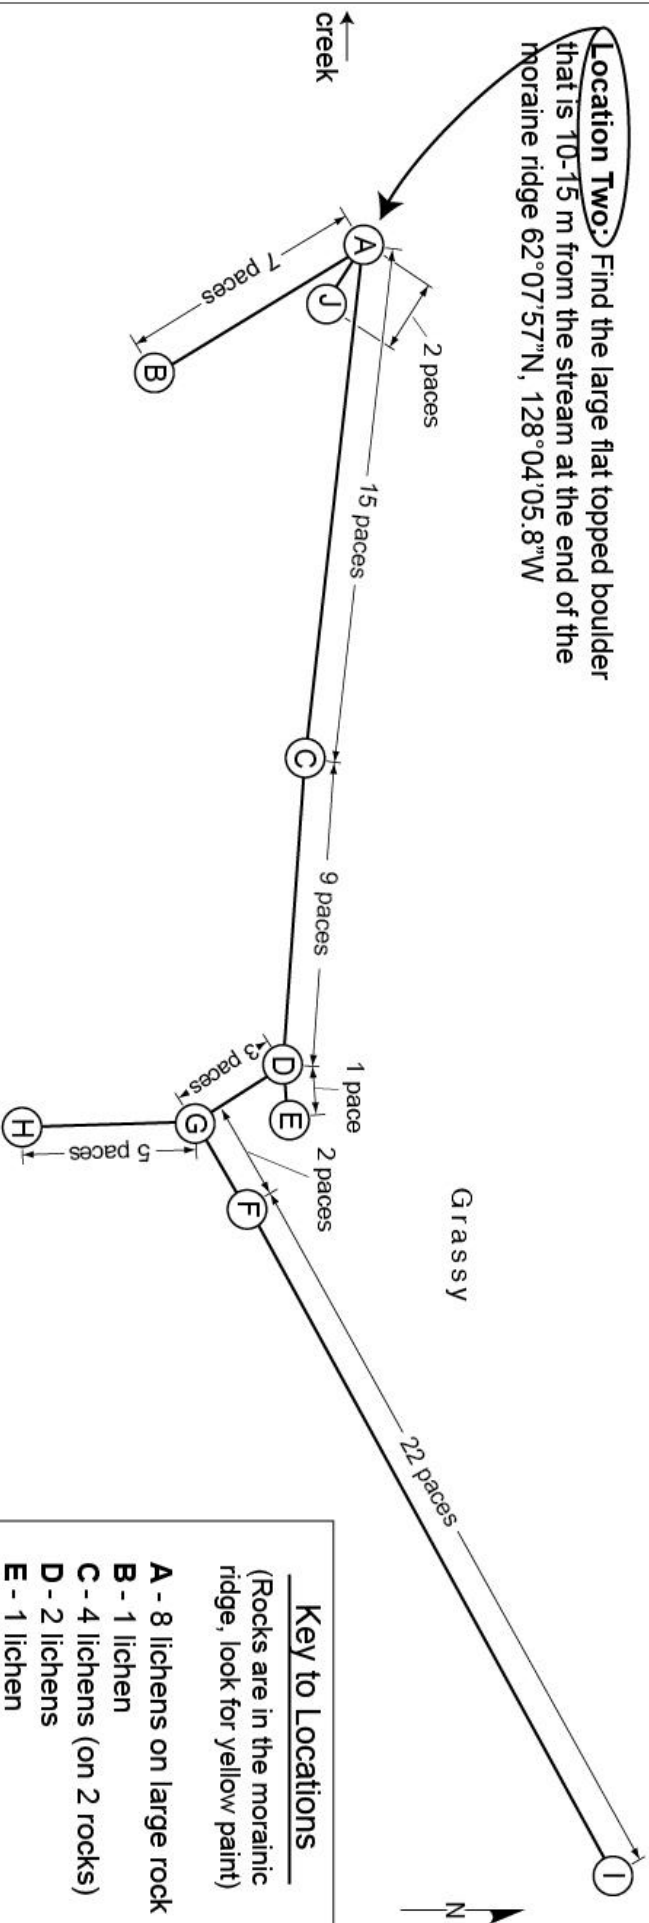

Yellow arrow and paint on granite at location 3. Would like photos to cover about 20cm wide and include two rulers.

Location 1: Very large lichens on Bologna Gl. moraines are right behind the person. Photos are ideally shot at 200 ISO, no flash and High Resolution RAW. Check that focus is sharp no blur and sharp on the lichen not just the rulers. Please use mid length lens (e.g., 60mm) not wide angle.

**Location One:** is on the large Moraine in the Bologna Gl. complex.  
It has 7 very large Rhizocarpon lichens on a large black boulder at:  
62°08'04.4"N, 128°04'23.6"W at Approx. 1590 masl.

**Location Two:** Find the large flat topped boulder that is 10-15 m from the stream at the end of the moraine ridge 62°07'57"N, 128°04'05.8"W

**Key to Locations**

(Rocks are in the morainic ridge, look for yellow paint)

- A - 8 lichens on large rock
- B - 1 lichen
- C - 4 lichens (on 2 rocks)
- D - 2 lichens
- E - 1 lichen
- F - 5 lichens (4 on 1 rock, 1 on smaller rock below)
- G - 2 lichens
- H - 1 lichen
- I - 3 lichens
- J - 5 lichens

**Location Three:** is on granite, walk upstream from Location Two, cross over two low ridges to find granite boulders marked lichens start at 62°07'52.2"N, 128°04'00.2"W
