

**GEOLOGY MAP OF THE SAND CREEK PROSPECT**

- LEGEND**
- Glacial debris, talus, frost heave
  - 5 Lamprophyre
  - 4d Feldspar porphyry
  - 4c Quartz-feldspar porphyry
  - 4b Coarse porphyritic granodiorite
  - 4a Granodiorite
  - 4 Undifferentiated - dominated by 4b
  - 3b Grey hornblende/biotite feldspar porphyry (andesite)
  - 3a Grey hornblende feldspar micro-porphyr (andesite)
  - 2c Coarse grained tonalite and tonalite aplite
  - 2b Coarse to medium grained quartz diorite
  - 2a Fine to medium grained diorite
  - 2 Undifferentiated diorite suite, later dykes, rafts
  - 1 Metamorphic schists and gneisses
  - Outcrop
  - Float
  - Contacts observed, interpreted
  - Fault
  - Assumed fault

Scale 1:5,000
