Acquisition Info: This archive is part of the Ontario Editorial Bureau fonds, donated by Lou Cahill in November 1997.

History: In March 1931, Captain Bruce Angus was sent to Sarnia by Gordon C. Leitch, general manager of Toronto Elevators. He was sent to inspect the Sarnian to ensure it was still seaworthy.

Leitch was a savvy business man, who had been active in the business community for a number of years. Leitch began his career with a partner in the lumber business. When that went under he moved into graineries and worked for the Winnipeg Wheat Pool for 12 years. After Winnipeg he
moved to Toronto, which was closer to his home town of Ridgetown, Ontario. In Toronto Leitch became manager of the Toronto branch of the Canadian Wheat Pool. While managing the wheat pools in Toronto Leitch became aware of huge costs associated with shipping the grains from the prairies into the Toronto area. He felt that there was no need for such costs and decided to do something to make them better and cheaper for the business.

Originally the grain was loaded onto Lakers that would bring the grain from the prairies to Lake Huron and Georgian Bay. It was stored there until needed by the Toronto graineries and then hauled across land by either truck or train. The land journey was the most expensive and the one which Leitch wanted to eliminate. This was a fine plan except for 2 obstacles that were quickly overcome. First of all the Welland canals were not large enough to accommodate the large carriers that were bringing in the grain. This was changing as the expansion and widening of the canals was already underway. The second issue was the lack of storage in Toronto for the grain. The grain elevators had been destroyed by fire in the late 1880s and never replaced. Leitch proposed his company built its own storage elevators along the waterfront to allow not only for easier access to the grain, and more timely production of products. The elevators would also create a reduction in shipping costs and an overall more competitive price for the customers of the grainery. The company refused, so Leitch went elsewhere to friends and contacts within the grain industry. The elevators were built and Leitch quit his job with the Canadian Wheat Pool and became the general manager of the elevators.

Although the elevators were built and ready for storage the next issue was filling them. None of the carriers wanted to do business with Leitch because the competition in Georgian Bay threatened to cancel their contracts if they did. Leitch saw no way around this, but to provide his own transportation. This is when he sent Captain Bruce Angus to scout out potential ships.

The ship was purchased for $37,000 and after another $30,000 was spent to fix it up, it was ready for business. The need for transportation and the finding of a seaways to the beginnings of the Northland Steamship Company. The Sarnian proved to not be enough for the business underway. Leitch decided another ship was necessary. He joined forces with James Norris the owner of the Norris Grain Company. He proposed they join forces to create a more economical means of transporting their products.

Scope and Content: The fonds contain materials relating to the Upper Lakes Shipping Company Ltd. The materials included are media releases, clippings, correspondence, and promotional materials. The materials were placed in
alphabetical order within a series and chronological order within designated titles. Original folder titles were retained.

---

**Organization:**

The records were arranged into four series:

Series I. Correspondence, 1958-1980

---

**Inventory:**

**Series I. Correspondence, 1958-1980**

1.1 Correspondence, 1958

1.2 Correspondence including suggested notes to Mr. Churchill at the Christening and Commissioning of the *Seaway Queen*, 1959

1.3 Correspondence including *Seaway Problems* by Captain S.J. Tischart, an address by G.M. Schuthe regarding some aspects affecting the outlook for Canadian Great Lake shipping and a History of Upper Lakes Shipping, 1960

1.4 Correspondence including captains’ and engineers’ meeting – questions and answers, a summary of papers given at the senior officers’ meeting, remarks of P.G. Kinsburgh at the senior officers’ meeting and remarks of J.D. Leitch at the senior officers’ meeting. Included in this file is a memo issued to employees regarding the “untrue statements” issued by the executive of the S.I.U. regarding an employee and the vessels the *Wheat King* and the *Northern Venture*. There is also a list regarding the picketing of ships, 1961
